ThermaXX Presentation;

Offering only the newest materials to create a very effective Thermal Jackets, complete with our exclusive asset identification and data collection Slate.

Areas Covered:

1. How the "Thermal jackets" has evolved to be a more effective product?
2. Where and when should a Thermal Jacket be used (interior/Exterior)?
3. Review a Heat Loss Survey, and understand the benefits.
4. Identification tags (Slates) and how they help manage your assets.
5. Smart Jacket, exclusive sensor with real time feedback
6. Better understanding the Incentive programs

VTS Presentation;

MOBILE STEAM ENERGY CONSERVATION SEMINAR

"P.I.E. Accredited Course"

Valley Tech. Sales is proud to offer our "Trap Trailer" Steam Energy Seminar.

Utilizing an onboard propane fired steam boiler, glass tubing and **Armstrong International** cut-away steam traps your technicians will be able to see what *really* goes on inside your steam & condensate systems. The one-hour presentation will focus on the properties of steam, steam's energy content, "best practice" steam trap selection and sizing considerations, ways to reduce consumption and boost efficiency. Additionally, we will review several "real world" scenarios typical to steam & condensate systems

AREAS COVERED-

- STEAM - Properties of Steam & Energy Loss Reduction
- TRAPS – Top 3 Types, Pro's & Con's, Proper Trap Selection
- WATER HAMMER – Know Thy Enemy
- CONDENSATE RETURN- Pressure Powered vs. Electrical Pumps

"PIE/PDH Accredited"

"Knowledge not shared, is energy wasted"
